

# LN3 Fit Quality - Full 3-Param MC | N=100

$P_{LN3}$  = shadow probability from fitted LN3 distribution     $P_{emp}$  = fraction of 100 samples above FOM (direct count, no model assumed)

Y-axis = probability DENSITY (prob per dB), not probability — integrates to 1 over all TL

Title colour: green=good (KS<0.10)    orange=ok (KS<0.15)    red=poor (KS>=0.15)
